Re: Envision RX Options Prescription Drug Card Program

Dear Tom:

We recently offered our associates at City Furniture the opportunity to enroll in the Envision RX Options Prescription Drug Card Program. Needless to say, the program was enthusiastically received, and the feedback from our associates is overwhelmingly positive.

Their program is accepted at over 55,000 pharmacies nationwide and covers all FDA approved brand name drugs and generic prescription drugs. As members, our associates always receive the lowest price available.

Envision provides 24/7 pharmacy and member assistance with bi-lingual support. Their website is user friendly and offers online drug pricing and a pharmacy locator. Our associates can even have prescriptions delivered through Envision's mail order facility.

There are no negatives with regard to this program. There is no waiting period or membership/enrollment fees. It is a complete win/win partnership for anyone who avails themselves of its benefits. In these difficult times, when individuals are often faced with health care challenges, Envision provides solutions through a team of knowledgeable, experienced professionals.

Sincerely,

A handwritten signature in blue ink that reads "Keith Koenig".
